Ecological Restoration/Service Hours

Part of the Jr. Naturalist Certification requires you to get out there and get to know your area and do a little investigating. To complete this portion of the certification get outside and get active—pick up some garbage along the trail or around your neighborhood, remove invasive species, or plant a rain garden with an adults help. Anything that will contribute to a happier, cleaner environment for everyone. These activities do not have to completed at FCSNA. (It is illegal to remove anything from areas within the park)

Why is restoration important?		
vviiv is restoration important:		

Hours	Activity	Date	Description	Adult's Signature
	Píckíng up trash			
	Pulling garlic mustard
