A Floral Fiesta

The woodland spring blooms are over, but they packed a punch!

Early summer prairie blooms are beginning! Come see them before it is too late!

Calling All Photographers!

The 2021 Calendar was such a hit that we plan on making another for 2022, but we need your help! Like last year, we are putting on a photo contest. Pictures can be of wildlife, people enjoying the park, or landscapes at Franklin Creek State Natural Area/Franklin Creek Headwaters. Photos can be from any time of year. If your photo is chosen, you will receive a free copy of the calendar! Calendars will be sold at the Grist Mill and at other local businesses. All proceeds will benefit Franklin Creek Conservation Association. Entries are due by July 1, 2021. Contact/submit to engage@franklincreekconservation.org.
**Leaving a Legacy**

Mary Keller was a lifelong Friend to FCCA and has left a legacy in the trees she planted and in the contributions she made to keeping the areas surrounding Franklin Creek preserved in perpetuity. She recently passed away, but her love for the natural areas and generosity are still alive within Franklin Creek. She will always be remembered through her generous donation that established Mary R. Keller Memorial Trust that will allow for FCCA to continue our mission to support the conservation and education of the Franklin Creek area. Coupled with the generosity and tireless efforts of her son John Keller, who passed away in 2014, FCCA has been able to protect the Headwater’s natural area and restore the 1480 Old Mill house to become a future education center for the area. The center, when finished, will be named in their memory. If you would like to leave your legacy to Franklin Creek like Mary and John, please contact Heather at engage@franklincreekconservation.org.

**Kid Friendly and Parent Approved**

Franklin Creek State Natural Area offers a lot of outdoor activities for families. There are playgrounds near trailheads, easily walkable hiking options, fishing on the Mill pond, and much more. Need a challenge? Stop by the Grist Mill to pick up a scavenger hunt and head out on the trails! If that’s not a challenge for your kids, consider our Jr. Naturalist Program. It is an at your own pace program, that allows your kids to learn more about the natural environment. To find out more about our Jr. Naturalist program, please visit our website at franklincreekconservation.org/junior-naturalist.
Volunteers Needed!

FCCA provides a variety of different volunteer activities for all age groups and experience levels. From stewardship and maintenance to Grist Mill Docent, we have opportunities for everyone!

If you would like to learn more about how YOU can get involved at FCCA please contact Heather at 815.456.2718 or at engage@franklincreekconservation.org.

What Does Age Have To Do With It?

It may come as a surprise to you, but Franklin Creek Conservation Association is turning forty years old this year! We have accomplished (with your help) so much since FCCA’s inception in 1981 as Franklin Grove Creek and Preservation Corporation that we do not have room for all of it in this newsletter! Before we detail our accomplishments, we want your help in remembering the first 4 decades of FCCA and Franklin Creek State Natural Area.

Please send your memories, comments, or pictures to engage@franklincreekconservation.org or post them to our Facebook, Instagram, or Twitter pages with the #40YearsAtFranklinCreek.
Franklin Creek Grist Mill

We are open! Come see our new gift shop, learn about places to hike, and our natural history! Can’t make it? Purchase some Franklin Creek merch on our webstore. We will be following state guidelines about social distancing, capacity limits, and mask wearing. Please check our website and social media for more information before heading out. Open Fri-Sun 12PM-4PM.

Connect and shop with us!

Trivia Night: A Slapping Success

There were many laughs, tricky questions, and all around good fun on our 4th Annual Trivia Night on April 17th. There were even multiple appearances from a Hickory Horned Devil! Do you know what that is? Our participants helped us raise money for our mission and won prizes at the same time. One participant remarked how much it felt like we were all in person, when we were just using Zoom. Next year, we hope to see everyone in person and hope to have an another great night! See you then!

Save The Dates

Events
June 4—First Friday Mill Open
June 12—Evening at the Mill with Mark Heinrich
July 17—Movie Night “A Bugs Life” at Lowell Park
August 7—Movie Night “The Lion King (2019)” at the Grist Mill
August 28th—Art Fair
September 11—Grist Mill Grind 10K

Stewardship Workdays
1st and 3rd Saturdays of the Month

Nature Hikes
June 26th, July 31st, August 28th, and September 25th

*If you are interested in attending please RSVP on our website, by phone 815.456.2718 or email engage@franklincreekconservation.org. All programs are subject to change.*
What is nature-deficit disorder? Is it a medical term? Is there a new drug that will ease some of the symptoms? Who is afflicted with this problem? No, this is not a medical condition and medicines will not bring relief. It is a term coined by Richard Louv, an author and former newspaper reporter, who wrote, Last Child In the Woods (Algonquin Books of Chapel Hill, 2008). In this book he describes a problem facing many industrialized societies today. He claims that children are not getting outdoors much and are becoming separated from nature. This problem also applies to some adults who have grown up attached to electronic umbilical cords. Televisions, computers, video games, and DVD and CD players account for a lot of time in the lives of many people (up to 65 hours a week for some).

One study of children, ages of 9 and 12, found that between 1997 and 2003 there was a 50% decline in their use of the outdoors for play. I wonder if the decline continued? There also has been a rise in obesity among children in this age group too. Other health problems include a sharp rise in Type 2 diabetes in children, depression, and Attention Deficit Hyperactivity Disorder (ADHD). Young people don’t seem to walk or ride a bicycle to school as much anymore. Even when they get there, some schools are cutting out recess periods and children sit in their seats for many hours each day. In one study in Great Britain, researchers found that children could identify more Pokémon characters than common plant and animals. In the United States children know more corporate logos than the names of trees and other plants in the neighborhood. When I was a kid during the summer, I played outside until I got hungry and sometimes I stayed out all day when I rode my bike to a fishing place. I built forts, carved out places in the woods for carnivals and miniature golf courses, played stickball in the streets, captured box turtles, and roasted potatoes on the coals.

What’s stopping today’s children from getting to know more about the natural world? Many changes have taken place since I grew up in the 1940s and 1950s. There are fewer farms today than there were then. Many of today’s parents restrict their child’s recreational freedom because of fear of stranger danger. These fears are greatly exaggerated and kids can be taught how to avoid most problems of this type. As our population rises, more and more vacant lots and stretches of woods and fields are turned over to housing developments. As lawsuits increase, some kids are restricted from climbing trees and playing near water. If a community like yours does not have a nature center, children have a hard time finding someone to teach them about the birds, rocks, wildflowers, and other natural things outside. Kids involved in organized sports and other activities have very little time to explore nature.

Because of these problems, park districts and schools should offer classes and nature walks in their communities. Some communities have built nature play areas and outdoor classrooms where children can have fun while learning about nature. First it takes leadership with a vision and then it takes people, time, and money to convert these visions into realities. Remember what Gandhi said, “You must be the change you wish to see in the world.”

The late Dr. Knapp was a faculty member at Northern Illinois University’s Lorado Taft Field Campus for 21 years. He taught courses in outdoor and environmental education.
Have You Made Someone’s Day?

We need your help! Help us get families and individuals involved in local history and nature, and protect, restore, and maintain the natural areas we all love so much!

“Our mission is to care for the natural areas of Franklin Creek for current and future generations.”

Yes, I wish to support FCCA!
